

NCSU'S PACKEATS

- Rishi Senthil Kumar (rsenthi)
- Rishabh Ravi Kumar (rishabh)
- Jagadeshwar Muthukumaran (jmathuk)
- Krishna Sanjaykumar Darji (kdarji)
- Priyal Brijesh Doctor (pdoctor)

MISSION STATEMENT

We aim to address the high-volume logistical challenge of serving both the NC State student body and the community living near campus by making on-campus restaurants more accessible. We are building a secure, closed-loop platform that provides quality food at rates cheaper than external services (like DoorDash). Our system actively supports the community by expanding on-campus employment opportunities for students as drivers, ensuring scalable service efficiency while providing reliable and compliant work. Our primary stakeholders will be Students (as Drivers), On-Campus Restaurant Chains, NC State (Dining Administration), and People Living Near Campus.

1

2

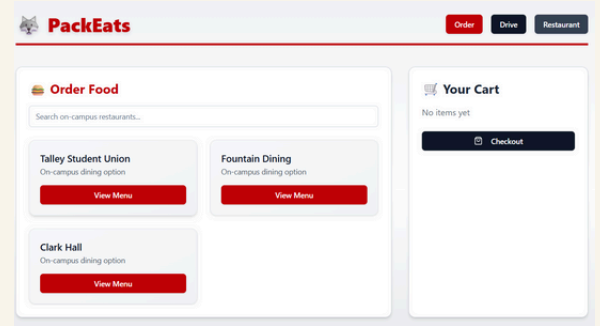

CORE DEVELOPMENT

- Accounts & Registration (Customers, Drivers, Student Employees).
- Menu & Cart + On-Campus Employment (packing assistance).
- Payments (secure checkout, tips, order confirmation).
- Order Tracking (real-time GPS, restaurant dashboards).

FEATURE EXPANSION

3

- Student Meal Plans (pay with campus credits).
- Split Payments (combine card + meal plan).
- Ratings & Reviews (restaurants, drivers, employees).
- Advanced Tools (inventory alerts, earnings dashboards, analytics).

4

TECHNOLOGY STACK

- UI → HTML, CSS
- Frontend → React.js
- Backend → Java Spring
- Database → PostgreSQL

EVALUATION & IMPACT

- Students: affordable food + part-time work opportunities.
- Restaurants: streamlined orders + expanded customer base.
- NC State Admin: scalable, secure, compliant solution.
- Community: accessible food delivery at cheaper rates.
